# Gus the lazy cat

### Original Photo

Gus the cat is the main focus of this photo. The lighting is blend of artificial and natural. The size is 13x30 and the resolution is 72. The photo was taken about 5 feet above the ground.

### Edited photo

The photo was darkened a little and it helps make the cats face stand out a bit more. It was also rotated to get more of the cat and less of the unnecessary carpet. It was cropped down using the crop tool in photoshop to get a more filling shot of Gus. The resolution is now 178 and the size is 5x7.

# Hole in 1!

## Original Photo

This photo was taken at the #4 green at four seasons golf course. There was an attempted use of leading lines and symmetry. The lighting is natural. Th resolution is 72 which is the base setting on the Iphone camera. The original photo size was 56x42.

## Edited Photo

The grounds keeper and some close tree branches using the stamp clone tool. The image was cropped to get rid of distractions to the right side. The vibrance was turned up a bit to make the grass a bit greener and make the image have a more warm feeling. The size was change down to a 5x8 and the final resolution is 378.
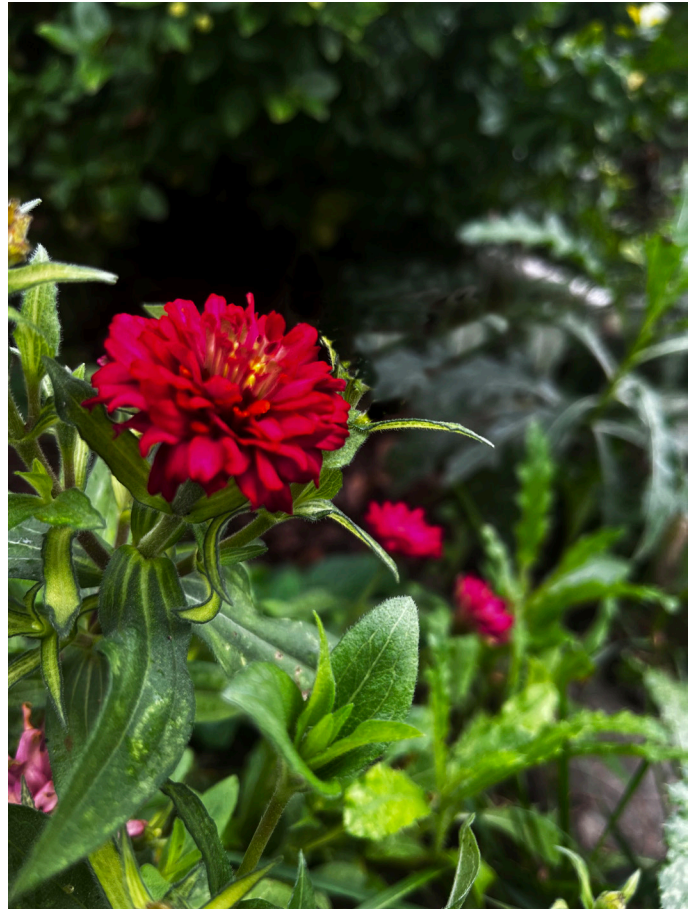

# Flower Power

## Original photo

This photo in the garden outside my house. There was a good amount of sunlight for a not so sunny day. The focal point is on the foreground to make the flower stand out and to give a close up image of this particular flower. A phone was used to take the picture and the resolution was 72.

## Edited Photo

The one bulb was removed so that the main focal point is the pink flower and not the bulb. On photoshop, the stamp tool was used to take the bulb out. A slight adjustment in the color was made to try and make the contrast a bit better. The resolution was left untouched as well as the size.

# Steven's Truck

## Original Photo

This was taken from a Iphone. A slightly elevated vantage point was used so that an isometric look at the truck was able to be seen. The resolution was 576.
The lighting is natural.

## Edited Photo

The white fence and then the power lines were removed using the clone stamp tool in photoshop. The curves were adjusted a bit to slightly lighten the photo to make it a little brighter. The tree on the left was slightly trimmed using the clone tool. The resolution was a bit high so it was lowered to 200.
